

## End-of-Manufacturing: P7300 UHF Portable

Bulletin: 2015SFM005

Date: April 24, 2015

Harris' P7300 UHF portable radio will reach its end-of-manufacturing date **October 30, 2015**. This will be the last date to order P7300 portable radios including the following radios:

- Portable, P7350, Scan (Partial Keypad)
- Portable, P7370, System (Full Keypad)

For a full list of affected model numbers, please refer to Table 2. The P7300 700/800 MHz radio models are not impacted by this announcement.

Remaining inventory of all models is limited and will be sold on a first-come, first-serve basis as supplies last. Customers who require additional inventory of the models listed below should act fast and place orders on or before October 30, 2015. Contact the Harris PSPC Customer Care Center for model availability. See Table 1 below for additional critical dates.

Regardless of this announcement, Harris will continue to honor all specific customer contractual obligations that differ with the dates and requirements set forth in this Notice.

**Table 1. Service and Support Information**

Milestone	Definition	Date
End-of-Manufacturing Announcement	Sales Force Mailing document	April 24, 2015

**Table 2. List of Affected P7300 Radios**

Description	Model Number
Portable, P7350, 450-512 MHz, Scan	MAEV-SUHXX
Portable, P7370, 450-512 MHz, System	MAEV-TUHXX

### Alternate Product Recommendation

The Harris XG-75Pe is a single-band radio operating in the UHF frequency band (450 – 512 MHz) and is an excellent alternative with the features and capabilities users need in a high performance and extremely rugged package. Available with either a limited or full keypad (*shown right*), the XG-75Pe supports EDACS<sup>®</sup>, P25 and OpenSky<sup>®</sup>. For more information on this radio, visit the PSPC website at <http://pspc.harris.com/Products/Radios.aspx>.
